

# RAINSCREEN PROGRAM

November 21st - Northern California

## *The International Masonry Institute Presents*

### *Principles of Estimating Rain Screen Walls Course November 21st, 2019*

[REGISTER HERE](#)

Please join us at the Mason Development Center in Tracy, CA to learn about one of the most popular building enclosure choices: Rain Screen wall systems.

#### **Program Description:**

This course will focus on why BAC Signatory Contractors should be involved in the installation of Ventilated Rain Screen Walls, different materials that constitute Ventilated Rain Screen walls and the basics for creating a thorough estimate for the various Rain Screen wall systems. It will be geared towards contractors who are interested executing this scope of work. Market research shows that these materials will continue to replace more traditional masonry materials. IMI is providing this course to develop the knowledge and skills for future bidding of rainscreen wall assemblies. Coinciding with this course will be the Rain Screen Training Course for BAC members.

## When
